

#188-2023-72

Certificate of Verification Compliance with Accepted Alarm Industry Standards

According to rules established by FirstNet - Built with AT&T, FirstNet eligibility is limited to those companies who meet accepted alarm industry standards that result in the transmission of public safety related alarms (e.g. robbery, burglary, unlawful intrusion, fire, emergency medical) to a Central Station Monitoring Facility that confirms and verifies the authenticity of the alarm and notifies a Public Safety Answering Point (PSAP) for relay to a public safety agency for the purpose of initiating an emergency response.

This certificate attests that The Monitoring Association (TMA) has verified that the following listed Company meets the required standards.

The required TMA verification includes compliance with standards such as ANSI/CSAA Standard CS-V-01 and ANSI/SIA Standard CP-01 that address procedures to reduce false alarms and dispatches, and compliance certifications of a nationally recognized laboratory (NRTL) (UL/ETL/Factory Mutual).

The company has also confirmed that it will provide approved FirstNet services only to other companies who also have a TMA Certificate of Verification.

Company Name: National Monitoring Center

Address: 25341 Commercentre Drive Lake Forest CA 92630
